Expertise

- Python
- Django
- javascript
- drf
- React.js
- git
- Postgresql
- Solid Principles
- MVT architecture
- Websocket

Used

- redis
- celery
- mongodb
- firebase
- postman
- hoppscotch

Integrations

- Razorpay
- Cloudinary
- S3
- Oauth 2.0

About Me

Adaptive and passionate web developer with a strong foundation in both Django and React, showcasing my ability to independently acquire and master new technologies. My journey in web development has been driven by an insatiable curiosity for emerging trends and an unyielding passion for creating innovative digital solutions.

Projects

BEATANDBASE

E-COMMERCE

BeatandBase is a cutting-edge e-commerce application tailored to headphone enthusiasts. Built on a Django backend, it offers a seamless shopping experience with a range of essential features. The platform is hosted on AWS EC2, ensuring scalability and reliability, and static files are efficiently served through AWS S3 integration

- **Shopping Cart:** Users can easily add headphones to their cart while browsing the collection.
- **Checkout:** A streamlined and secure checkout process for quick order placement.
- **Order Management:** Both users and administrators can conveniently track and manage orders.
- **Wishlist:** Users can save their favorite headphones for future reference.
- **User Profiles:** Personalized profiles empower users to manage their information and preferences efficiently.
- **Refund Process:** A straightforward system for initiating and processing refunds, enhancing customer satisfaction.

BRONET

SOCIAL MEDIA

Bronet is a bespoke social media platform designed exclusively for BroCamp students, fostering connections and collaboration within the BroCamp community. This dynamic platform enables students to chat, follow their peers, and share a variety of content, including polls, videos, images, and articles. Additionally, users can personalize their profiles with comprehensive details, such as skills, projects, education experiences, social media links, and advice.

- **Chat Functionality:** Bronet facilitates direct communication between BroCamp students, creating a space for meaningful interactions and networking.
- **Diverse Post Types:** Bronet offers a diverse range of content sharing options, including the ability to engage the community through polls, share project videos and experiences, upload images to capture moments, and contribute insightful articles to enrich the BroCamp community's knowledge base.
- **Comprehensive User Profiles:** through user profile can highlighting users skills, showcasing projects, sharing educational experiences and add their advices
